

Dromeda Vista Features

- Assembled drone with LED lights and advanced 3+3 stabilization system
 - Durable plastic airframe designed to survive everyday crashes with ease
 - Factory-installed motors, ESCs and radio gear
 - High-intensity LEDs for easy orientation and tracking—LEDs also flash to alert you to low battery voltage
 - 3-axis gyro and 3 accelerometers for smooth, stable flight. Accelerometers can be turned off for greater flying freedom
 - 3.7V 850mAh LiPo battery for 12-15 minutes of flight time per charge
 - High-output USB fast charger to get you back in the air faster
- MR100 2.4GHz SLT Radio includes:
 - Auto-Flip Button for pro-style flips on demand
 - 2.4GHz technology, for the best in interference-free flight
 - SLT (Secure Link Technology) for creating instant, unbreakable links between the receiver and your transmitter's unique coded signal. Fly with friends and without worry!
 - Dual rates and four flight modes (Easy, Normal, Advanced and Expert) to customize response to your skills and preferences
 - Sound and light cues to simplify setup, confirm settings and provide alerts
 - Digital trims for precise settings and better control

Includes:

- Fully assembled and equipped drone
- MR100 SLT radio system
- 3.7V 850mAh LiPo battery and USB charger
- 4 "AAA" alkaline batteries
- Extra set of blades
- Screwdriver
